

Artist Statement

Alexa Karabin

Through a variety of techniques, I create artworks that explore themes of natural history, historical occurrence, memory, and cycles. On an aesthetic level, I am interested in complexity of texture and detail, and simplicity of design. I often take a minimalist approach by painting a single object in white space, but I focus on the intricacies of the object. These specific pieces explore the equinox by focusing on the sun and the lack of sun: day and night.
